Montage

Die der Brause beige packte Siebdichtung muss eingebaut werden, um Schmutzeinspülungen aus dem Leitungsnetz zu vermeiden. Schmutzeinspülungen können die Funktion beeinträchtigen und/oder zu Beschädigungen an Funktionsteilen der Brause führen, für hieraus ergebende Schäden haftet Hansgrohe nicht.

Hansgrohe Einhandmischer können in Verbindung mit hydraulisch und thermisch gesteuerten Durchlauferhitzern eingesetzt werden wenn der Fließdruck mindestens 0,15 MPa beträgt.

Bei der Montage des Produktes durch qualifiziertes Fachpersonal ist darauf zu achten, dass die Befestigungsfläche im gesamten Bereich der Befestigung plan ist (keine vorstehenden Fugen oder Fliesenversatz), der Wandaufbau für eine Montage des Produktes geeignet ist und insbesondere keine Schwachstellen aufweist.

Die beigelegten Schrauben und Dübel sind nur für Beton geeignet. Bei anderen Wandaufbauten sind die Herstellerangaben des Dübelherstellers zu beachten.

Montage

Le joint à filtre fourni avec la pomme de douche à main doit être installé afin de retenir des impuretés du système de conduites. Ceux-ci pourraient influencer le fonctionnement de ce produit et même endommager des pièces mobiles. Des réclamations à la suite de l'usage de la pomme de douche sans joint-tamis de hansgrohe ne peuvent pas faire partie de notre garantie.

Les mitigeurs monocommandes Hansgrohe fonctionnent également en association à des chauffe-eau à commande hydraulique ou thermique à condition que la pression soit au minimum de 0,15 MPa.

Lors du montage du produit par un ouvrier qualifié, il faut faire attention à ce que la surface de fixation soit plane sur toute son étendue (aucun dépassement de joint ni de carrelage), que la construction de la paroi soit adaptée à l'installation du produit et surtout ne présente aucun point faible.

Les vis et les chevilles fournies sont uniquement appropriées au béton. Pour les autres constructions, il faudra tenir compte des préconisations du fabricant de cheville.

*Silicone (sans acide acétique!)

Adjust the dimensions to the tile pattern if required.

Assembly

The mesh washer must be insert to protect the overhead shower against incoming dirt by pipework. Incoming dirt leads to defects or/and can damage parts of the shower; such caused faults voids all liability and guarantee claims.

Hansgrohe single lever mixers can be used together with hydraulically and thermically controlled continuous flow heaters if the flow pressure is at least 0,15 MPa.

Where the contractor mounts the product, he should ensure that the entire area of the wall to which the mounting plate is to be fitted, is flat (no projecting joints or tiles sticking out), that the structure of the wall is suitable for the installation of the product and has no weak points.

The enclosed screws and dowels are only suitable for concrete. For another wall constructions the manufacturer's indications of the dowel manufacturer have to be taken into account.

Adattare le misure alla dimensione delle piastrelle.

Montaggio

Per proteggere la soffione doccia da eventuali impurità provenienti dalle tubazioni dell'acqua, deve essere inserito il filtro nell'impugnatura della doccia stessa. Tali impurità possono infatti causare difetti e/o danneggiare parti della doccia; in questo caso la Hansgrohe non risponde dei danni.

I miscelatori Hansgrohe possono venire usati con caldaie a "bassa pressione" se la pressione del flusso è almeno di 0,15 MPa.

Waterdimmer® Set

Quando il personale tecnico specializzato esegue il montaggio del prodotto è necessario assicurarsi che la superficie di fissaggio sia piana in tutta l'area di fissaggio (senza giunti sporgenti o spostamento delle piastrelle), che la struttura della parete sia adatta per il montaggio del prodotto e soprattutto che non ci siano dei punti deboli.

Le viti e i tasselli in dotazione sono adatti solo per calcestruzzo. In caso di altre strutture della parete vanno osservare le indicazioni del produttore dei tasselli.

Montaje

La junta de filtración que se suministra con la ducha mural evita que las partículas de suciedad procedentes de las tuberías lleguen a la ducha mural. Debe colocarse entre el flexo y la ducha mural. Infiltraciones de suciedad deterioran el funcionamiento de la ducha mural y pueden causar daños en el interior de la misma que no están cubiertas por la garantía de Hansgrohe.

Los mezcladores Hansgrohe pueden ser utilizado junto con calentadores continuos de agua que sean manejados de manera hidráulica o térmica, siempre que la presión del caudal ascienda a un mínimo de 0,15 MPa.

En el momento del montaje del producto por parte de personal especializado y cualificado se deberá prestar una atención especial a que la superficie de fijación en toda el área de la fijación sea plana (sin juntas que sobresalen ni azulejos desplazados), que la estructura de la pared sea adecuada para un montaje del producto y que, ante todo, no presente puntos débiles.

Los tornillos y tacos adjuntos son sólo apropiados para hormigón. En el caso de otras estructuras murales se deberán considerar las indicaciones del fabricante de tacos.

Montage

Het bij de hoofddouche verpakte zeefje moet worden ingebouwd om vuil uit de waterleiding te weren. Vuil uit de leidingen kan de werking van de hoofddouche negatief beïnvloeden en/of de hoofddouche beschadigen. Voor deze schade is Hansgrohe niet verantwoordelijk.

Hansgrohe ééngreepsmengkranen kunnen samen met hydraulisch en thermisch gestuurde geisers gebruikt worden indien de uitstroomdruk min. 0,15 MPa bedraagt.

** Hvid

Ved montering er det vigtigt at sikre sig, at hele befæstigelsesfladen er plan (ingen ujævne fuger eller fliser), samt at væggen er egnet til montering af produktet og specielt, at væggen ikke har nogen svage punkter.

De medfølgende skruer og dübler er kun egnet til beton. Ved anden vægopbygning bør producenten af dübler kontaktes for nærmere information.

*Silikone (eddikesyre-fri)

Montagem

O filtro de rede deve ser colocado para proteger o chuveiro de areias e resíduos provenientes da tubagem. Resíduos e areias podem danificar componentes, ou provocar mau funcionamento do chuveiro; as avarias assim provocadas anulam a nossa responsabilidade e anulam a nossa garantia.

As misturadoras monocomando Hansgrohe podem ser utilizadas com esquentadores (de controlo térmico ou hidráulico) desde que a pressão de utilização seja, no mínimo, de 0,15 MPa.

Durante a montagem do produto por técnicos qualificados, deve ter-se em atenção que a superfície de fixação seja plana em toda a área da fixação (sem juntas sobrepostas/salientes ou ladrilhos deslocados), que o dispositivo de montagem na parede seja adequado para uma montagem na parede e que este não apresente nenhuns pontos fracos.

Os parafusos e buchas incluídos no volume de fornecimento são apenas adequados para betão. Para outros métodos de montagem na parede devem ser respeitadas as indicações do fabricante das buchas.

*Silicone (sem ácido acético)

Montaż

Znajdujące się przy prysznicu sitko musi zostać zainstalowane, aby zatrzymać zanieczyszczenia z instalacji. Przedostające się zanieczyszczenia mogą mieć ujemny wpływ na działanie i/lub prowadzić do usterek w działaniu elementów prysznica. Za powstałe z tego tytułu szkody firma Hansgrohe nie ponosi odpowiedzialności.

Mieszacze jednouchwytowe Hansgrohe mogą być stosowane w połączeniu z przepływowymi podgrzewaczami wody, sterowanymi hydraulicznie i termicznie, gdy ciśnienie wody wynosi co najmniej 0,15 MPa.

Montáž

Do přívodu musí být zabudováno se sprchou dodávané sítko, aby zachycovalo nečistoty vyplavené z vodovodní sítě. Vyplavené nečistoty mohou ovlivnit funkci sprchy a nebo mohou vést i k jejímu poškození. Na takto vzniklé škody se nevztahuje záruka firmy Hansgrohe.

Pákové baterie Hansgrohe mohou být používány ve spojení s hydraulicky nebo tepelně řízenými průtokovými ohřivači, pokud tlak při průtoku je alespoň 0,15 MPa.

Při montáži produktu kvalifikovaným odborným personálem je třeba dbát na to, aby upevňovací plochy byly v celém rozsahu upevnění rovné (žádné vyčnívající spáry nebo navzájem přesazené obklady), aby konstrukce stěny byla pro montáž produktu vhodná a zvláště aby v ní nebyla žádná slabá místa. Příložené vruty a hmoždinky jsou vhodné pouze pro beton. Při jiných konstrukčních materiálech stěny je třeba se řídit údaji výrobce hmoždinek.

*Silikon (bez kyseliny octové!)

如果可能，可根据瓷砖方格调整尺寸。

安装

必须装上花洒所附带的滤网密封垫，以过滤管道里的杂质污物。杂质污物会影响花洒的功能和/或损坏花洒的功能部件，由此而产生的产品损坏不属于汉斯格雅的保修范围。

如果水压达到1.5 bar以上，汉斯格雅单手柄龙头可以和液压式或热控式直流式热水器一起使用。

Waterdimmer® Set

Croma 3jet*/Croma 2jet*/Croma 1jet*/Croma Variojet*/Tastica*

在安装产品的位置，安装人员必须确保安装面的墙面是平的（没有突出物或瓷砖没有突起），墙体结构适合产品的安装并没有弱点。包装内的膨胀螺丝只适用于混凝土墙体。对于其他墙体结构必须咨询膨胀螺丝生产商的建议。

При определении внешних размеров при монтаже старайтесь по возможности учитывать расположение кафельной плитки.

Монтаж

Для предотвращения попадания частиц грязи из водопроводной сети необходимо установить фильтр, прилагаемый к ручному душу. Частицы грязи могут нарушить отдельные функции и/или привести к повреждению функциональных деталей ручного душа, Hansgrohe не несет ответственность за повреждения вследствие отсутствия фильтра.

Однорычажные смесители фирмы HANSGROHE можно использовать с электроводонагревателями бойлерного типа при минимальном давлении 0,15 МПа.

При монтаже изделия квалифицированным персоналом необходимо следить за тем, чтобы, поверхность крепления была плоской во всей зоне крепления (без выступающих швов или смещения плитки), структура стен подходила для монтажа изделия и, в частности, не имела слабых мест.

Прилагаемые винты и дюбели предназначены только для бетона. При других типах стен необходимо соблюдать указания производителей дюбелей.

*Силикон (не содержит уксусной кислоты!)

A méretet a lehetőségekhez mérten igazítsuk a csempe elrendezéséhez.

Szerelés

A kézi zuhanyhoz csomagolt szűrőtömítést be kell szerelni a vízhálózatból származó szennyeződések kiküszöbölésére. A beáramló szennyeződések akadályozhatják és / vagy teljesen tönkre is tehetik a zuhany funkcióit. Az ezekből adódó károkért a Hansgrohe nem felel.

A Hansgrohe egykaros keverő csaptelepek beépíthetők hidraulikus- és hőszabályozással ellátott átfolyós vízmelegítőknél egyaránt, ha a víznyomás legalább 0,15 MPa.

Miközben szakképzett szakember végzi a termék felszerelését, ügyelni kell arra, hogy a rögzítési felületek a rögzítési terület teljes egészén síkok (nincsenek kiálló fugák vagy csempeszélek), a fal felépítése alkalmas a termék felszereléséhez, és különösképpen, hogy nincsenek benne gyenge pontok. A mellékelt csavarok és dübelek csak betonhoz alkalmasak. Egyéb falazatoknál figyelembe kell venni a dübelgyártó gyártói utasításait.

Asennus

Käsisuihkun mukana toimitettu sihttiiviste on asennettava paikalleen, jotta lian huuhtoutuminen vesijohtoverkostosta käsisuihkuun estyy. Huuhtoutuvat likahiukkaset voivat häiritä suihkun toimintaa tai vahingoittaa toimintaosia, Hansgrohe ei vastaa tästä aiheutuneista vahingoista.

Hansgrohe yksivipuisia sekoittimia voi käyttää hydraulisesti tai termisesti ohjattujen läpivirtauskuumentimien yhteydessä, jos virtauspaine on vähintään 0,15 MPa.

Kun pätevä ammattihenkilöstö suorittaa tuotteen asennusta, on huomioitava, että kiinnityspinta on koko kiinnityksen alueella tasainen (ei ulkonevia saumoja tai laattojen tasomuutoksia) ja, että seinän rakenne soveltuu tuotteen asentamiseen eikä siinä ole heikkoja kohtia. Mukana olevat kiinnityssruuvit ja kiinnitysankkurit soveltuvat betoniin kiinnittämiseen. Kiinnitettäessä tuotetta muihin seinärakenteisiin, noutata kiinnittimien valmistajan ohjeita.

Anpassa måtten till kakelmönstret så långt detta är möjligt.

Montering

Silpackningen som följer med duschen måste monteras för att undvika att smuts från ledningsnätet tränger in. Smuts som spolas in kan påverka funktionerna och/eller leda till skador på funktionsdelar i duschen. Hansgrohe fränsäger sig allt ansvar för skador som kan härledas till detta.

Hansgrohe enhandsblandare kan användas tillsammans med hydrauliskt och termiskt styrda varmvattenberedare när flödestrycket uppgår till minst 0,15 MPa.

När kvalificerad fackpersonal monterar produkten är det viktigt att tänka på att monteringsytan är plan i alla delar av arbetsytan (inga fogar som sticker ut eller klinkerförskjutningar), att väggkonstruktionen passar till monteringen samt att den inte har svaga punkter. Medföljande skruvar och plugg är endast avsedda för betong. Vid andra väggkonstruktioner skall anvisningarna från pluggtillverkaren beaktas.

Jei įmanoma, kabindami stovą derinkite prie plytelių.

Montavimas

Tinklelis, kuris yra rankų dušas pakuotėje, privalo būti įstatytas, kad būtų apsaugota nuo išorės nešvarumų. Nešvarumai gali pakenkti rankų dušas funkcionalumui ir (arba) sugadinti rankų dušas funkcines dalis. Tokiu atveju "Hansgrohe" atsakomybės neprisiima.

"Hansgrohe" vienos rankenėlės maišytuvai gali būti naudojami su hidrauliškai ir termiškai reguliuojamais momentiniais šildikliais, kai vandens slėgis mažesnis kaip 0,15 MPa.

Prilagodite mjeru što je više moguće rasteru pločica

Sastavljanje

Filter (A) potrebno je ugraditi kako bi se regulirao protok vode i smanjio dotok prljavštine. Ako želite jači protok vode umjesto filtera ugradite rešetku (B). Za eventualna oštećenja uzrokovana prljavštinom proizvođač Hansgrohe nije odgovoran.

Hansgrohe jednoručne slavine se mogu koristiti sa hidrauličnim i termički kontroliranim protočnim bojlerima ako je tlak najmanje 0,15 MPa.

Boyutları olabildiği kadar fayans tipine uyarlayın.

Montajı

El duşu kafasına eklenmiş olan süzgeç contası, boru şebekesinden sızan kirlerin önüne geçmek için, yerine monte edilmelidir. İçeri sızan bu kirler duşun fonksiyonunu sekteleyebilir ve/veya duşun fonksiyon parçaları üzerinde hasarlara sebep olabilir, bu yüzden meydana gelen hasarlardan Hansgrohe sorumlu tutulamaz.

Su akış basıncı en azından 0,15 MPa olan yerlerde Hansgrohe tek kollu bataryalarını, hidrolik ve termik kumandalı şofbenlerle birlikte kullanabilirsiniz.

Reglați dimensiunile la suprafața tencuiei.

Montare

Montați garnitura de filtru livrată împreună cu capătul de duș de mână pentru evitarea pătrunderii impurităților din rețeaua de alimentare. Impuritățile pătrunse pot influența funcționarea aparatului și/sau provoca deteriorarea capătului de duș. Garanția nu acoperă aceste daune.

Bateriile monocomadă Hansgrohe pot fi utilizate cu boiler instant cu comandă termică sau hidraulică dacă presiunea apei de alimentare este de min. 0,15 MPa.

La montarea produsului de către un personal calificat trebuie să fiți atenți ca suprafața, unde se fixează produsul să fie plată pe toată suprafața utilizată (să nu existe rosturi sau faianțe proeminente), peretele să fie adecvat pentru montarea produsului și să nu există zone de rezistență redusă.

Șuruburile și diblurile livrate sunt potrivite pentru ziduri de beton. La alte tipuri de zid respectați instrucțiunile producătorului diblului utilizat.

*Silicon (fără acid acetic!)

Date tehnice

Presiune de funcționare: max. 0,6 MPa
 Presiune de funcționare recomandată: 0,1 – 0,4 MPa
 (1 MPa = 10 bar = 147 PSI)
 Temperatura apei calde: max. 60° C

Προσαρμόστε τις διαστάσεις κατά το δυνατόν στο ράστερ των πλακιδίων.

Συναρμολόγηση

Πρέπει να εγκατασταθεί το παρέμβυσμα φίλτρου που συνοδεύει τον καταιονιστήρα κατά τέτοιο τρόπο, ώστε να αποφεύγονται ρύποι που προέρχονται από το δίκτυο ύδρευσης. Οι ρύποι από το δίκτυο ύδρευσης μπορούν να επηρεάσουν αρνητικά και/ή να προξενήσουν ζημία στα λειτουργικά τμήματα του καταιονιστήρα (ντους). Τέτοιου είδους ζημίες δεν καλύπτονται από την εγγύηση Hansgrohe.

Οι αναμεικτικές μπαταρίες Hansgrohe μπορούν να λειτουργούν και σε συνδυασμό με ταχυθερμοσίφωνες θερμικού ή υδραυλικού ελέγχου, εφόσον η ελάχιστη πίεση ροής είναι 0,15 MPa.

Κατά τη συναρμολόγηση του προϊόντος από καταρτισμένο και εξειδικευμένο προσωπικό θα πρέπει να δοθεί προσοχή, ώστε η επιφάνεια στερέωσης στη συνολική περιοχή στερέωσης να είναι επίπεδη (να μην υπάρχουν προεξέχοντες αρμοί ή λιθογόμωση πλακιδίων), ώστε η κατασκευή του τοίχου να είναι κατάλληλη για τη συναρμολόγηση του προϊόντος και ώστε η επιφάνεια να μην παρουσιάζει αδύναμα σημεία.

Οι συνημμένες βίδες και οι στυλίσκοι ενδείκνυνται μόνο για σκυρόδεμα. Σε άλλες επίτοιχες κατασκευές θα πρέπει να δοθεί προσοχή στα δεδομένα του Κατασκευαστή των στυλίσκων.

*Σιλικόνη (δίχως οξικό οξύ!)

Τεχνικά Χαρακτηριστικά

Λειτουργία πίεσης: max. 0,6 MPa
 Συνιστώμενη λειτουργία πίεσης: 0,1 – 0,4 MPa

Mere kar najbolj prilagodite vzorcu ploščic.

Montaža

Filter, ki je priložen ročni prhi, je potrebno vgraditi, da prho zaščitimo pred umazanijo iz vodovodne napeljave. Umazanija lahko okvari ali poškoduje dele ročne prhe. Za tako nastalo škodo Hansgrohe ne odgovarja.

Enoročne mešalne baterije Hansgrohe lahko uporabljate v povezavi s hidravlično in termično uravnavanimi pretočnimi grelniki, če je pretočni tlak najmanj 0,15 MPa.

Mõõtude puhul arvestage võimalusel plaatide asetusega.

Paigaldamine

Kaitsmaks dušši torust tuleva mustuse eest, on vaja paigaldada dušiga kaasasolev mustusesõel. Sissetulev mustus võib funktsioneerimist kahjustada ja/või rikkuda duši detaile. Sellest tulenevate kahjude eest Hansgrohe ei vastuta.

Hansgrohe ühekäe segisteid võib kasutada koos hüdrauliselt ja termiliselt juhitavate boileritega, kui vee rõhk on vähemalt 0,15 MPa.

Waterdimmer® Set

Croma**

*** roheline
** hall
* valge

Toote paigaldamisel peab töövõtja tagama, et kogu seinapind, kuhu paigaldusplaat kinnitatakse, on lame (ükski vuuk ega keraamiline plaat ei ulatu esile), ning et seina konstruktsioon on toote paigaldamiseks sobiv ja sellel puuduvad nõrgad kohad.

Kaasasolevad kruvid ja tüüblid sobivad üksnes betoonile. Muude seinakonstruktsioonide puhul tuleb arvesse võtta tüüblitootja esitatud tooteandmeid.

*Silikoon (äädikhappeta!)

Izmērus pēc iespējas pielādzināt flīžu rakstam.

Montāža

Jāiementē dušas komplektā esošais filtrs, lai novērstu netīrumu ieplūšanu no ūdens vada. Ieskalotie netīrumi var traucēt dušas funkciju un / vai arī izraisīt rokas dušas daļu bojājumus, par kuriem Hansgrohe nenes atbildību.

Hansgrohe viensvira jaucējkrānus var izmantot kombinācijā ar hidrauliski un termiski vadāmiem caurteces sildītājiem, ja plūsmas spiediens ir vismaz 0,15 MPa.

Waterdimmer® Set

Prilagodite meru što je više moguće rasteru pločica.

Montaža

Obavezno ugradite mrežicu (A) upakovanu s tušem, čime sprečavate ulazak prljavštine iz vodovoda. Prljavština može dovesti do delimičnog ili potpunog oštećenja delova tuša. Za eventualna oštećenja uzrokovana prljavštinom proizvođač Hansgrohe nije odgovoran.

Hansgrohe jednoručni mešači se mogu koristiti s hidraulički i termički kontrolisanim protočnim bojlerima, ako je pritisak najmanje 0,15 MPa.

Kada proizvod montira kvalifikovano stručno osoblje treba paziti da čitava površina na koju se učvršćuje bude ravna (bez istaknutih fuga ili krivljenja pločica), da je zidna konstrukcija primerena montaži proizvoda, i posebno da nema slabih mesta.

Priloženi zavrtnji i tiplovi prikladni su samo za beton. Kod drugih zidnih nadgradnji treba obratiti pažnju na navode proizvođača tiplova.

***Silikon (ne sadrži sirćetnu kiselinu!)**

Montasje

Silpakningen som er levert med dusjen skal bygges inn for å forhindre at smuss spyles inn fra ledningsnett. Innspylt smuss kan påvirke funksjonen negativt og/eller kan medføre skader på hånddusjens funksjonsdeler. Hansgrohe påtar seg inget ansvar for skader som resulteres av dette.

Armaturer fra Hansgrohe kan brukes sammen med hydraulisk og termisk styrte gjennomstrømningsovner når gjennomstrømningsstrykket er på minst 0,15 Mpa.

Når kvalifisert fagfolk monterer produktet, skal man påse at hele området der produktet monteres er plant (ingen fremstående fuger eller flisekanter), at oppbygging av veggen er egnet for montasje av produktet og at veggen ikke viser noen svakpunkter. Medleverte skruer og plugger egner seg kun for betong. Ved en annen veggoppbygging skal man ta hensyn til pluggprodusentens henvisninger.

*Silikon (uten eddiksyre)

Монтаж

Опакованото заедно с разпръскателя уплътнение с цедка трябва да се монтира, за да се избегне натрупване на замърсявания от водопроводната мрежа. Натрупването на замърсявания може да наруши функцията и/или да доведе до увреждания на функционалните части на разпръскателя, Hansgrohe не носи отговорност за получените се по този начин щети.

Смесителите с една ръкохватка на Hansgrohe могат да се използват във връзка с хидравлично и термично управляеми проточни нагреватели, ако хидравличното налягане е минимум 0,15 МПа.

При монтаж на продукта от квалифицирани специалисти да се внимава за това, закрепващата повърхност в целия диапазон на закрепването да бъде равна (без изпъкнали фуги или изместване на плочки), конструкцията на стената да е подходяща за монтаж на продукта и особено за това, да няма слаби места.

Приложените винтове и дюбели са подходящи само за бетон. При други стенни конструкции да се спазват данните на производителя на дюбели.

*Силикон (без оцетна киселина!)

Përmasat i duhen përshtatur mundësisht këndit të pllakave të murit

Montimi

Sita që i kemi bashkëngjitur spërkatëses duhet përdorur për të evituar thithjen e papastërtive nga rrjeti i ujës jellësit. Ndotjet mund të dëmtojnë pjesë funksionale të spërkatëses. Hansgrohe nuk merr përgjegjësinë për dëmet e shkaktuara në këtë mënyrë.

Armaturat me ujë të përzier të Hansgrohe mund të përdoren në kombinim me ngrohës elektrikë të ujit të drejtuar në mënyrë hidraulike ose termike nëse presioni i rrjedhjes është minimumi 0,15 MPa.

Waterdimmer® Set

Gjatë montimit të produktit nga ana e personit të kualifikuar duhet pasur parasysh që e gjithë sipërfaqja mbërthyesë të jetë e drejtë (nuk duhet të ketë hapësira mes pllakave). Mbi të gjitha muri duhet të jetë i përshtatshëm për montim dhe nuk duhet të ketë pika të dobëta. Vidhat dhe kunjat e bashkangjitura janë të përshtatshme vetëm për beton. Te përbërja tjetër murore të merren parasysh të dhënat e prodhuesit të kunjave.

*Silikon (pa acid uthulle!)
